PROFILE

Economics and Mathematics undergraduate with practical experience in data analytics using Excel, SQL, and Power BI. Focused on transforming raw data into clear, decision-ready insights through dashboards and structured analysis.

EDUCATION

Egerton University | Expected Graduation: 2026

Bachelor of Arts in Economics and Mathematics - Fourth Year, Semester II

Relevant Coursework: Econometrics, Statistical Methods, Mathematical Economics, Data Analysis, Research Methods

TECHNICAL SKILLS

Data Tools: SQL, Microsoft Excel, Power BI

Excel Skills: Pivot Tables, Data Cleaning, Lookup Functions

Data Analytics: Exploratory Analysis, Dashboard Design, Trend Analysis

SOFT SKILLS

Communication: Strong verbal and written communication skills; able to convey information clearly to diverse audiences.

Teamwork: Collaborative team player with the ability to work effectively with others towards shared goals.

Decision Making: Excellent analytical and critical thinking skills to assess situations and make sound, informed decisions.

Time Management: Highly organised with the ability to prioritise tasks and meet deadlines consistently.

Problem Solving: Proactive in identifying challenges and developing practical, data-driven solutions.

Adaptability: Quick to learn and adapt to new environments, tools, and responsibilities.

PROJECTS

HR Employee Attrition Analysis

- **Problem:** Identified factors contributing to employee turnover to support HR decision-making.
- **Tools & Methods:** Excel and Power BI - data cleaning, segmentation, and attrition rate analysis.
- **Output:** Interactive dashboard highlighting key drivers of attrition (department, tenure, performance), with actionable insights summarized in a report.

Personal Finance Dashboard

- Problem: Tracked and analysed income, expenses, and savings trends to improve financial planning.
- Tools & Methods: Excel and Power BI - budget categorization and monthly trend analysis.
- Output: Visual dashboard showing spending patterns and savings performance, enabling informed budgeting decisions.

Sales Performance Dashboard

- Problem: Evaluated sales data to identify performance trends and top-performing products.
- Tools & Methods: Excel and Power BI - KPI tracking, comparative analysis, and data visualization.
- Output: Dashboard presenting revenue trends, product performance, and sales growth metrics for management review.
